The black-lacquered aluminum housing and hard coated PC lens with UV coated makes it impact-resistant, shock resistant and immune to scratches, ensures long lasting durability.

WATERPROOF & BEZEL-LESS & SCREW-LESS FRAME DESIGN

IP67 Waterproof Silicone built, prevent from any sand, water, dirt, snow or dust and reduce wind resistance and noise

»» Strong Red Brake

»» Amber Turn Signal

»» Red Rear Position

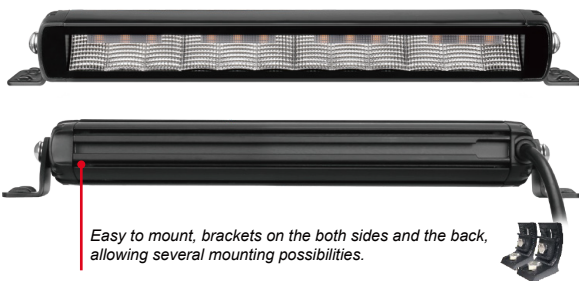

»» White Reverse

CERTIFICATION R148

R7(Brake Light) R6(Turn Signal Light) R7(Rear Position Light) R23(Reversing Light)

Easy to mount, brackets on the both sides and the back, allowing several mounting possibilities.

Red : Brake Light +
Green : Rear Position Light +
Gray : Reversing Light +
Black: Power Supply -
Yellow : Turn Signal Light +

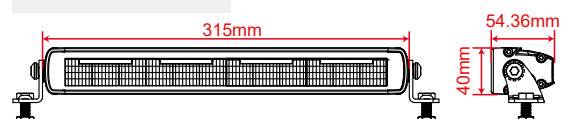

When two or more types are lit, the priority is : reversing light > brake light > rear position light, and the turn signal is controlled independently.

- ◆ E-approved, which makes it legal to mount on the vehicle as a tail light.
- ◆ World's first tail light bar that integrates four functions of brake light, reversing light, turn signal and rear position light.
- ◆ Safer Design: This LED tail light Bar includes reverse polarity and automatic short-circuit protection to prevent potential danger.
- ◆ Working Temperature: -30C ~ +65C, work in various weather and capable to withstand inclement weather.
- ◆ Applications: Compatible with all kinds of on-road using vehicle, trucks, semi trailers, cargo trailers, boat trailers, work vehicles etc.

◆ Technical Data
